MOISTURE PROTECTION

While some competitors use a plastic hinge hardware, **Access** uses a heavy-duty galvanized steel plate for hinge hardware.

Sintered metal inserts are known for their superior durability and glide properties. We use a better solution than a plastic insert which some competitors use.

Access latch plates include additional hooks to safeguard and create a better connection into the door frame.

Our **Interior Doors** will give your home a special touch, with the perfect combination of design, functionality and quality.

Access Interior Doors are a hallmark of excellence.
